Gas Supplies & The Decent Homes Meeting Carbon Energy Reduction Target

About Us

Complete Energy Solutions is a leading gas infrastructure provider within the UK. We have a national footprint and offer bespoke, convenient, end-to-end services in gas as well as electricity, water and telecommunications.

We are part of the Future Energy Group Ltd formerly (JFD Group Holdings Ltd) and operate with the Group's professionalism and commitment to corporate responsibility as you would expect with a company who has over 45 years experience.

Our Expertise

We specialise in the following types of project:

- Disconnection of existing gas services (for demolition and refurbishment).
- Bringing gas to non-gas areas by installing new mains and services.
- Installing gas to single properties in areas where the gas mains are already installed.
- Sustainable housing through regeneration.

Working on these projects is our dedicated Social Housing Team, made up of experienced staff who own and project manage the installation of gas to residents such as yours from concept right through to completion.

We are already working in partnership with housing associations, local authorities, arms length management organisations (ALMOs) and registered social landlords (RSLs) with their contractors throughout the UK.

The Service

- We manage all projects from feasibility through to design, installation and adoption of the infrastructure by network owners.
- We work with you to ensure that the property list for gas supplies are scheduled to meet the needs of your central heating installation programme.
- We project manage both social housing and private resident installations.
- By understanding our chain of custody we use 'no dig' technology wherever practicable to minimise the impact on the environment and disruption to residents.
- We can help arrange fuel switching allowances for switching to gas through CERT in partnership with one of the eight OFGEM approved energy suppliers.

- We discount a proportion of the cost of infrastructure with contributions from one of our independent gas transporter (IGT) partners who will operate and maintain the life time management of the gas system.

Benefits To You

- No multiple application forms required.
- No elongated quotations.
- Installation of meters with services.
- Reducing cost to your overheads.

*A Leading utilities infrastructure
provider throughout the UK*
